Appl. No. 10/665,892
Response Dated April 24, 2007
Reply to Office Action of January 24, 2007

Docket No.: 1070P3822
Examiner: Tran, Tuyetlien T
TC/A.U. 2179

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1.   (Original) A method for displaying information in a handheld device, comprising:

displaying information in a plurality of dynamically sizable cells in a display screen of said handheld device; and

dynamically and automatically sizing cells of said plurality of cells in response to the amount of said information to be displayed in said cells.

2.   (Original) The method described in Claim 1 wherein said dynamically and automatically sizing is performed also in response to the number of active cells of said plurality of cells.

3.   (Original) The method described in Claim 2 wherein said sizing comprises adjusting a size of a first cell in response to an amount of information displayed in a second cell.

4   (Original) The method described in Claim 2 wherein each of said cells of said plurality of cells comprises a different category of daily information.

Appl. No. 10/665,892

Reply to Office Action of January 24, 2007

Docket No.: 1070P3822
Examiner: Tran, Tuyetlien T
TC/A.U. 2179

5.   (Original) The method described in Claim 1 wherein one category is daily event information.

6.   (Original) The method described in Claim 1 wherein one category is daily to-do information.

7.   (Original) The method described in Claim 1 wherein one category is daily message information.

8.   (Original) The method described in Claim 1 wherein said display screen is a touch-screen display.

9.   (Original) The method described in Claim 1 wherein said display screen is switchable between a small display mode which is substantially square in shape and a tall display mode which is substantially rectangular in shape.

10.   (Original) The method described in Claim 9 wherein said substantially rectangular display screen is oriented in a portrait mode.

11.   (Original) The method described in Claim 9 wherein said substantially rectangular display screen is oriented in a landscape mode

Docket No.: 1070P3822
Examiner: Tran, Tuyetlien T
TC/A.U. 2179

12.   (Original) The method described in Claim 9 further comprising suppressing display of a first cell of said plurality of cells.

13.   (Original) The method described in Claim 12 further comprising enlarging the area of a second cell in response to said first cell being suppressed.

14.   (Currently Amended) A computer system comprising: memory coupled to a bus; a processor coupled to said bus; and a display screen coupled to said bus, wherein said memory comprises instructions for implementing a method of displaying calendar information, said method comprising:

displaying information in a plurality of dynamically sizable cells in a display screen of said ~~handheld device~~ computer system; and

dynamically and automatically sizing cells of said plurality of cells in response to the amount of said information to be displayed in said cells.

15.   (Original) The computer system described in Claim 14 wherein said dynamically and automatically sizing is performed also in response to the number of active cells of said plurality of cells.

16.   (Original) The computer system described in Claim 15 wherein said sizing comprises adjusting a size of a first cell in response to an amount of information displayed in a second cell.

Appl. No. 10/665,892

Docket No.: 1070P3822
Examiner: Tran, Tuyetlien T
TC/A.U. 2179

17.   (Original) The computer system described in Claim 14 wherein each of said cells

of said plurality of cells comprises a different category of daily information.

18.   (Original) The computer system described in Claim 14 wherein one category is

daily event information.

19.   (Original) The computer system described in Claim 14 wherein one category is

daily to-do information.

20.   (Original) The computer system described in Claim 14 wherein one category is

daily message information.

21.   (Original) The computer system described in Claim 14 wherein said display

screen is switchable between a small display mode which is substantially square in shape

and a tall display mode which is substantially rectangular in shape.

22.   (Original) The computer system described in Claim 21 wherein said substantially

rectangular display screen is oriented in a portrait mode.

23.   (Original) The computer system described in Claim 21 wherein said substantially

rectangular display screen is oriented in a landscape mode.

24.   (Currently Amended) A computer ~~implemented~~ user interface comprising:

a display to present a plurality of dynamically sizable on-screen displayable cells

for presenting categories of daily information therein, wherein said plurality of cells

comprise a first cell and a second cell and wherein said first cell is automatically

dynamically sized based on its content and also based on content of said second cell.

25.   (Currently Amended) A computer ~~implemented~~ user interface as described in

Claim 24 wherein said second cell is automatically dynamically sized based on its

content and also based on content of said first cell.

26.   (Currently Amended) A computer ~~implemented~~ user interface as described in

Claim 24 wherein said first cell displays daily event information.

27.   (Currently Amended) A computer ~~implemented~~ user interface as described in

Claim 24 wherein said second cell displays daily to-do information.

28.   (Currently Amended) A computer ~~implemented~~ user interface as described in

Claim 24 further comprising a third cell of fixed size for on-screen displaying of daily

message information.

29.   (Currently Amended) A computer ~~implemented~~ user interface as described in

Claim 24 wherein display of cells of said plurality of cells is capable of being suppressed

and wherein said first cell is enlarged in response to display of said second cell being

suppressed.

TC/A.U. 2179

30.   (Currently Amended) A computer ~~implemented~~ user interface as described in Claim 24 wherein display of cells of said plurality of cells is capable of being suppressed and wherein said second cell is enlarged in response to said ~~third~~ first cell being suppressed.

31.   (Currently Amended) A computer ~~implemented~~ user interface as described in Claim 24 wherein display of cells of said plurality of cells is capable of being suppressed.

32.   (Currently Amended) A computer ~~implemented~~ user interface as described in Claim ~~23~~ 24 wherein display of cells of said plurality of cells is capable of being suppressed and wherein said first cell is enlarged in response to display of said second cell being suppressed.

33.   (Currently Amended) A computer ~~implemented~~ user interface as described in Claim 24 wherein said first cell comprises a minimum size definition and wherein further said first cell is decreased in size if its content requires less size than its minimum size definition.

34.   (Currently Amended) A computer ~~implemented~~ user interface as described in Claim 24 wherein said first cell is increased in size provided its content requires more size than its minimum size definition and provided further that said second cell is decreased in size below its minimum size definition.

TC/A.U. 2179

35.   (New) A computer ~~implemented~~ user interface as described in Claim 34 wherein said first cell displays daily event information, wherein said second cell displays daily to-do information and further comprising a third cell of fixed size for on-screen displaying of daily message information.

36.   (New) An article comprising a storage medium containing instructions that if executed enable a system to display information in a handheld device, comprising:

 displaying information in a plurality of dynamically sizable cells in a display screen of said handheld device; and

 dynamically and automatically sizing cells of said plurality of cells in response to the amount of said information to be displayed in said cells.

37.   (New) The article of claim 36, wherein said dynamically and automatically sizing is performed also in response to the number of active cells of said plurality of cells.

38.   (New) The article of claim 37, wherein said sizing comprises adjusting a size of a first cell in response to an amount of information displayed in a second cell.

39.   (New) The article of claim 37, wherein each of said cells of said plurality of cells comprises a different category of daily information.

40.   (New) The article of claim 36, wherein one category is daily event information.

Reply to Office Action of January 24, 2007

Docket No.: 1070P3822
Examiner: Tran, Tuyetlien T
TC/A.U. 2179

41.   (New) The article of claim 36, wherein one category is daily to-do information.

42.   (New) The article of claim 36, wherein one category is daily message information.

43.   (New) The article of claim 36, wherein said display screen is a touch-screen display.

44.   (New) The article of claim 36, wherein said display screen is switchable between a small display mode which is substantially square in shape and a tall display mode which is substantially rectangular in shape.

45.   (New) The article of claim 44, wherein said substantially rectangular display screen is oriented in a portrait mode.

46.   (New) The article of claim 44, wherein said substantially rectangular display screen is oriented in a landscape mode

46.   (New) The article of claim 44, further comprising instructions that if executed enable the system to suppress display of a first cell of said plurality of cells.

48.   (New) The article of claim 46, further comprising instructions that if executed

enable the system to enlarge the area of a second cell in response to said first cell being

suppressed.
